Examiner's Amendment

1. An Examiner's Amendment to the record appears below. Should the changes or additions be unacceptable to Applicant, an amendment may be filed as provided by 37 C.F.R. § 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the Issue Fee.

2. Pursuant to M.P.E.P. §606.01, this title has respectfully been changed to read as follows:

-- SINGLE IP-ADDRESSING FOR A TELECOMMUNICATIONS PLATFORM WITH A MULTI-PROCESSOR CLUSTER USING A DISTRIBUTED SOCKET BASED INTERNET PROTOCOL (IP) HANDLER --

Reason for allowance

3. The following is the Examiner's statement of Reason for Allowance. This statement is not intended to necessarily state all the reasons for allowance or all the details why claims are allowed, nor it specifically or impliedly state that all the reasons for allowance are set forth. The primary, or important reason for allowance of the claims is the inclusion of the limitation(s) in all the claims, which is not found in the prior art references. Applicant's disclosure must be relied on to properly determine the meaning of term, clauses, and/or limitations in the claims. Where an explicit definition is provided by the applicant for a term, that definition will control interpretation of the term as it is used in the claim. *Toro Co. v. White Consolidated Industries Inc.*, 199 F.3d 1295, 1301, 53 USPQ2d 1065, 1069 (Fed. Cir. 1999) (see MPEP 2106)

In this case, the prior art of record teaches the claimed invention substantially as claimed, however fails to teach or suggest individually or in combination the following subject matter as a whole comprising: using a cluster of processors to perform collectively a platform (e.g. Fig. 3a) processing function, the plural processors of the cluster each executing an IP software application, each having, the same IP address and each having a respective IP interface (i.e. Ethernet interfaces as particularly defined on page 11, lines 27-28); distributing an IP handling function (e.g. as generally shown on fig. 2) throughout the cluster with IP for forwarding IP frames received from outside the platform on any of the plural IP interfaces executing an IP software applications; passing IP frames incoming to the platform to a router regardless of which of the plural IP interfaces receives the frame, the router being hosted by one of the plural processors of the clusters; using the router to route the IP frames to an active socket central part; wherein determining and forwarding (of claim 9 or interface interconnect of claims 21-22) associated with the active socket central part platform incoming IP to one particular socket distributed

part hosted on one particular processor of the plural processors of the cluster, wherein the forwarding to a "correct one" of the plural processors executing an IP software application all having the same IP address (i.e. based on a correlation between each processor and IP interface "socket", specs page 11, lines 1-9, and the IP interface on each processor is connected to the appropriate one of the distributed interface interconnect parts, specs page 12, lines 3-11), set forth in substance on independent claims 9 and 21-22.

4. Double patent analysis has been performed with respect to *issued patents* having common relationship of inventorship and/or ownership with respect to the above-allowed claims, *none* are found to warrant a double patenting rejection.

5. Any comments Applicants considers necessary must be submitted no later than the payment of the Issue Fee and to avoid processing delays, should preferable accompany the Issue Fees. Such submission should be clearly labeled "Comments on Statement of Reasons for Allowance". In event of any post-allowance papers (e.g. IDS, 312 amendment, petition, etc.), Applicant is exhorted to mail papers to the Production Control branch in Publications or faxed to post-allowance papers correspondence branch at (703) 308-5864 to expedite issuing process or call PUB's Customer Service if any questions at (703) 305-8497.
